

Career Objective

Seeking a responsible job with an opportunity to work for an organization which will inspire me to enhance my knowledge and utilizing my skills towards the growth of the organization.

Projects:

1. Title: AI BASED VOICE ASSISTANT
  - Description:** AIVA is capable of doing many things such as to search the Internet. It has some new features like posting comments on the social media websites such as Facebook, Twitter, etc. It also helps in searching location & weather around you. It can open and launch web-applications and the local storage of the user computer.
  - Key Technologies:**  
Language used: Python
  - Conclusion:** AIVA works on the verbal input rather than the text which saves time.
2. Title: AUDIO CAPTCHA
  - Description:** CAPTCHAs are employed as security measure to differentiate human users from bots. It is an API having a grammar file which contains audio file (.wav). The captcha is a voice note of 3 -5 seconds.
  - Key Technologies:**  
Language used: JAVA

**Conclusion:** CAPTCHA API can be used as security feature in many other applications to protect it from Bot.
